

Nyok Boon Hui

Software Developer

Address: Kuala Lumpur, Wilayah Persekutuan Kuala Lumpur

E-mail: wenhuiyang@gmail.com

Portfolio: <https://w3nhuii.github.io/portfolio>

Education

2023-06

Bachelor of Science: Software Engineering
Universiti Tunku Abdul Rahman -
Kajang, Selangor

Full-Stack Developer with over 2 years of experience designing, developing, and maintaining scalable web and mobile applications. Experienced in building end-to-end solutions using **Vue.js**, **Flutter**, **Spring Boot**, and **MySQL**, with a strong understanding of both frontend and backend development. Proficient in developing RESTful APIs, database design, system integration, and application architecture using **MVVM** principles. Skilled in delivering cross-platform mobile applications, responsive web interfaces, and robust backend services throughout the complete software development lifecycle. Strong communicator with the ability to collaborate effectively across cross-functional teams. Fluent in Mandarin, Malay, Cantonese, and English (spoken and written).

Skills

- Understanding of RESTful APIs
- Mobile and Web UI and UX design
- Experience with Flutter and React Native
- Version control with Git
- Experience with app store deployment
- React.js and Vue.js web development
- Backend and API architecture with Spring Boot
- Database design with MySQL
- AWS Code pipeline web deployment

Work History

April 2025 – Present

Full Stack Developer

Bunkerchain Pte Ltd, Singapore

- **Full-Stack Development:** Developed, maintained, and scaled cross-platform mobile applications using **Flutter** (iOS & Android) and web applications with **Vue.js** and **Tailwind CSS**, ensuring responsive UI and efficient state management.
- **Backend & API Architecture:** Engineered robust, scalable RESTful APIs and microservices using **Spring Boot**, implementing secure data validation, error handling, and business logic for maritime and logistics workflows.
- **Database Design & Optimization:** Designed, optimized, and managed relational databases using **MySQL**; wrote complex SQL queries, optimized indexing, and managed data integrity to ensure high-throughput and low-latency data retrieval.
- **Cross-Functional Collaboration:** Collaborated with product managers, designers, and frontend/backend engineers to bridge the gap between user interfaces and complex server-side logic, delivering reliable end-to-end solutions.
- **Performance Tuning:** Integrated APIs and optimized application performance on both the client and server sides, leveraging **Spring Boot** caching mechanisms and **MySQL** query optimization to reduce technical overhead.
- **SDLC & Quality Assurance:** Contributed to the full software development lifecycle (SDLC)—from requirements gathering and schema design to testing, deployment, and ongoing production support—while maintaining high code quality and scalability standards.

Aug 2023 - April 2025

Mobile Application Developer

Agmo Studio Sdn Bhd, Petaling Jaya, Selangor

- Integrated third-party APIs into mobile applications, enhancing their functionality and usability for end users.
- Increased app store ratings by consistently addressing user feedback and implementing improvements in subsequent updates.
- Ensured application quality by conducting thorough testing prior to release, identifying and fixing bugs.
- Developed and maintained web and mobile applications using **React.js**, **React Native**, and **Flutter**, ensuring high performance and responsiveness.
- Integrated **RESTful APIs** to enable smooth backend communication, enhancing app functionality.
- Designed and implemented mobile application architectures using **MVVM** for cleaner code and easier maintenance.
- Collaborated with cross-functional teams to design and implement intuitive UI/UX solutions.
- Followed **Git Flow** for version control and seamless deployment across development environments.

Oct 2022 - Jan 2023

Software Intern

FOOTFALLCAM SDN BHD, Kajang, Selangor

- Perform testing on people tracking devices.
 - Bug fixing for the website (**React.js**).
 - Analyze data captured from the people tracking devices.
 - Communicate with real clients of the company to perform testing.
-

Accomplishments

- Successfully published mobile applications across Google Play Store, Apple App Store, and Huawei AppGallery.
- Published Flutter packages on Pub.dev with X+ downloads and adoption by the developer community.
- Reduced API response times by X% through backend and database optimization.
- Delivered major features and enhancements across web and mobile platforms while maintaining high code quality standards.
